

PREVENTATIVE MAINTENANCE

Aidacare's Preventative Maintenance and Asset Management Programs are tailored to meet our customer's requirements.

OUR COMMITMENT IS YOUR SATISFACTION

Aidacare is dedicated to the repair and on-going maintenance of healthcare equipment. We offer a commitment to our customers to ensure we deliver the best service at competitive pricing.

Aidacare's maintenance includes advantages of:

FULLY TRAINED TECHNICIANS

All of our technicians are qualified and trained in our own manufacturing facilities, and by our suppliers. They are qualified to ensure your healthcare equipment is serviced according to the Australian standards, so it is compliant and safe to use.

ALL WORK GUARANTEED

Parts and labour are guaranteed. Using only quality parts and the latest diagnostic techniques, all repairs will be performed to the manufacturer's standards. We also offer the latest in product updates and refurbishments.

COMPETITIVE RATES

Our access to all major manufacturers' parts gives us the ability to offer the best pricing ensuring that our charges are competitive in every market every time.

MOBILE WORKSHOPS

For inspection, service and repair - we can come to you. Our service vans are fully equipped mobile workshops carrying a large range of spare parts. Our service technicians have quick access to service records and pricing details to minimise the downtime of your equipment.

PREVENTATIVE MAINTENANCE

Our service Agreements can cover a vast range of healthcare equipment and incorporate inspection and maintenance to ensure:

- Risk Management
- Compliancy
- Maximising product lifetime
- Reassurance that the equipment is safe for patient care

Benefits of our Service Agreements:

- Provides service history of the product
- Compliancy and accreditation preparedness
- Asset Condition Profiling (Good / Poor / Replace etc.)
- Improved risk management via consistency of supply and control of service levels
- Improved financial planning for R&M budgets
- Improved CAPEX planning and insight into the condition of your assets via the Service Asset Register
